# Curriculum Development using VR technology to enhance empathetic communication skills in future health care professionals

Agreement Number 2019-1-CY01-KA203-058432

5TH NEWSLETTER – SEPTEMBER - FEBRUARY 2021 - 2022

#### What is empathy?

"The capacity to put one's self in another's shoes and feel what that person is going through and share their emotions and feelings" can be defined as Empathy. More specifically, as far as the Healthcare section is concerned can be determined as "the recognition and validation of a patient's fear, anxiety, pain, and worry". Moreover, it is the ability to understand patients' feelings and facilitate a more accurate diagnoses and more caring treatment. Expressing patient empathy not only advances humanism in healthcare but it is also the key ingredient to enhancing the patient experience and patient encounter. Both empathy and compassion in healthcare play vital roles in the patient experience and are key components of the health care provider-patient relationship. When a patient arrives to see their healthcare provider, the patient's medical condition — whether it is a severe illness or injury, a chronic condition, or simply a routine check-up – will often manifest emotions that influence the way the patient experiences his/her illness and the treatment. So, it is extremely important for the patient to feel that he/she is receiving the very best care, and that is conveyed when his/her care team is empathetic and compassionate.

#### Welcome to the Empathy in Health Care

Empathy in Health Care aims to develop curriculum and materials on empathetic skills, certified with ISO, that will be based on current research evidence and patient participation through their own personal experiences, ideas and expectations (for VET and Higher Education).

EMPATHY IN HEALTH develops high acuity scenarios in the areas of empathetic communication which (a) provides a consistent clinical communication experience, (b) enhances student confidence in developing new skills by allowing them to practice in a safe environment and (c) provides students the opportunity to develop empathetic skills and competences. Based on the above scenarios, the project will develop virtual reality videos (sector specific), educational videos (sector specific) and role plays (sector specific) all aiming to develop the empathetic competence. Finally, the project aims to support tutors and trainers to integrate Virtual Reality in their teaching/training through the development of their skills as far as virtual reality is concerned. The project provides the tools and techniques for this integration to the higher education and VET providers in the consortium, thus supporting tutors in delivering the

training. At the same time, the results of the project will be available to other higher education institutions and other vet providers.

# **Project Objectives**

The main objectives of the project are:

- Develop an empathetic skills curriculum and materials, certified with ISO that will be based on current research evidence and patient participation through their own personal experiences, ideas and expectations (for Vocational Training and Higher Education),
- Use this curriculum to develop high acuity virtual scenarios in the areas of empathetic communication which will (a) provide a consistent clinical communication experience, (b) enhance student confidence in developing new skills by allowing them to practice in a safe environment and (c) provide student feedback on areas of strength and further improvement
- Develop VR videos and educational videos (Sector specific) to develop the empathetic competence,
- Support tutors and trainers to integrate VR in their teaching /training through the development of their skills as far as virtual reality is concerned.

# **Deliverables at a glance**

The following are the main deliverables of the project

- IO1: Qualification Framework: Empathetic Communication in Health Care Profession
- IO2: Certification Scheme for the Certification of Curricula and Materials
- IO3: Curriculum: Empathetic Communication in Health Care Profession
- o IO4: A list of scenarios
- IO5: Interactive Virtual Reality Videos for Health Care Profession (using avatars)
- IO6: Educational Videos in Health Care Profession
- IO7: Tutor Guides (2) for Health Care Professionals (HE and VET)
- o IO8: Virtual Reality Authoring Tool

# **Project progress until now**

The development of the Curriculum, Tutors' Guides, and educational videos is one of the milestones of the period. Both HE and VET curricula were designed to provide trainees with the knowledge, skills, and competencies required to interact more effectively with their patients during their illness or treatment.

After their completion, all curricula and training materials (tutor's guides) will be assessed and certified. The certification will establish an internationally recognized standard of quality for the EmpathyInHealthcare curriculum and training materials. Certification will enable the transferability of materials outside of the consortium and provide an incentive for HE students and healthcare professionals to engage in the training, since the quality will be guaranteed.

The certification will be done by the CCC's Assessment Committee and will be based on the Certification Regulation developed within the project.

Furthermore, two project meeting were organized. The eighth project meeting was held online on September 8, 2021. The main topics addressed during the meeting, were the development of the Curricula Tutors' Guides for Higher Education and VET Education.

The ninth project meeting was held online on November 1, 2021. During the meeting, the first scenario developed under IO4 by the researchers of UNIC that will be used into a VR video by Omega Technology, was presented to the partners for their feedback and discussion.

Fig. 1. UNIC researchers' team has started filming the first educational video.

### **Next Steps**

To proceed with the pilots, the partners are currently finalizing the tutors' guides, VR scenarios, and educational videos. Pilots will be conducted for both Higher Education students and health care professionals. After Curriculum and Tutors' Guides are finalized, the certification procedure will begin.

#### Introducing the team

MMC Mediterranean Management Centre (Cyprus) is a provider of CPD training and C-VET certification for workers and employability initiatives for disadvantaged groups. MMC has a vast experience in coordination of projects as it has already coordinated very big projects such as ERASMUS, EQUAL, Leonardo DOI, Leonardo TOI and Key activity.

Contact Details: 16 Imvrou street, Nicosia 1055 Cyprus, +357 22 466633, eu@mmclearningsolutions.com

UNIC-University of Nicosia (Cyprus) is a private university that through its five Schools offers more than 100 Bachelor, Master and doctoral degrees in the areas of business, science, medicine, education and the liberal arts.

Contact Details: 46 Makedonitissas Avenue, CY-2417 P.O. Box 24005, CY-1700 Nicosia, Cyprus

C.C.C.-Cyprus Certification Company (Cyprus) Government-owned а is Certification Organization founded in 2001 and operating as a private company with the Government being its only shareholder.

**Contact Details:** Kosta Anaxagorou 2014 Strovolos Nicosia Cyprus, +357 22411435, info@cycert.org.cy

Vrije Universiteit Brussel (Belgium) founded in 1970, provides education for over 16,000 students in 8 faculties

and has been participating in the Erasmus program since the start of the program in 1988.

Contact Details: Laarbeeklaan 103 1090 Jette, Tel: 322 477 47 20

Charité Universitätsmedizin Berlin CHARITÉ (Germany) represents a single medical faculty, which serves both

Humboldt Universität zu Berlin and Freie Universität Berlin. Charité extends over four campuses, and has over 100 different Departments and Institutes, which make up a total of 17 different CharitéCenters.

Contact Details: Charitéplatz 1, 10117 Berlin, Tel:: +49 30 450 - 50

University of Thessaly (Greece) with 37 Departments, and 8 schools is a University with its own identity and with a prominent

position in our national educational system. University of Thessaly provides undergraduate and postgraduate programs and extra-curricular modules in specific research and business fields, for over 43000 students
